### CP Calibration Pump

[Close Item](#)

#### Description:

CP1500 Calibration Pump CP-1500 Calibration Pump provides ability to raise/lower trapped sensing pressure to facilitate calibration of pneumatic instruments. The CP1500 does not require any outside power source and works by compressing trapped pressure. The fine adjustment capability ensures precise pressure loading of control devices for calibration and testing purposes.

#### Literature:

CP1500 Calibration Pump - Sales

#### Features:

- Maximum Pressure – 1500 PSIG
- ¼ NPT Port allows technicians to build custom test rigs
- Compatible with all VRG control instrumentation
- Multiple units may be installed in parallel for greater compression
- No outside pressure source required to operate

#### Accessories & Options:

- Custom configurations with gages, fittings and valves
- Multiple unit configurations for greater compression

#### Models:

- CP1500
